PROFILE

Strategic Business Analyst with 2.5+ years of experience in requirements engineering, business analysis, and solution delivery. Leveraging AI-powered tools and techniques to enhance requirement analysis, documentation quality, and process optimization. Skilled in stakeholder management, business process analysis, and creating functional documentation and Change Requests. Adept at translating business needs into clear, actionable solutions that drive operational efficiency and business value.

WORK EXPERIENCE

TechnoNext Software Limited

Business Analyst

Dec 2025 - Present

- Led HRIS development and system optimization initiatives to improve workforce management, HR operations, data integrity, and reporting accuracy within an Agile environment.
- Performed business requirement, gap and impact analysis to define effective solutions and improvement opportunities.
- Managed backlog, prioritizing and refining requirements to support Agile sprint planning and end-to-end SDLC delivery.
- Translated business needs into BRD, SRS, PRD, and functional specifications to ensure alignment across business and technical teams.
- Managed end-to-end SDLC activities including workflow design, prototyping, UAT coordination, and change management.
- Designed workflows, process diagrams, and UI prototypes using AI-powered tools to enhance requirement analysis and solution visualization.
- Collaborated with development, QA, UI/UX, and operations teams in Agile sprint cycles to ensure smooth delivery and stakeholder alignment.

Junior Business Analyst

Jun 2024 - Nov 2025

- Collaborated with stakeholders to gather requirements, perform gap analysis, and support solution design to improve clarity and reduce rework.
- Prepared SRS, change requests, and process flow diagrams to support development and ensure accurate documentation.
- Supported UAT execution, vendor coordination, and end-user training to ensure smooth delivery and adoption of solutions.
- Worked closely with development, QA, UI/UX, and operations teams to ensure alignment across SDLC phases.

Intern Business Analyst

Feb 2024 - May 2024

- Assisted in requirement gathering and process analysis for food delivery and medical travel systems.
- Contributed to SRS, change requests, and process flow documentation to improve clarity and support development.
- Supported UAT execution and end-user training to ensure smooth validation and adoption of solutions.
- Collaborated with cross-functional teams across SDLC to support end-to-end delivery activities.
